Company information

Shenzhen Keyuantai Industrial Co., Ltd.

Established in 2003, our company is a professional R&D and OEM&ODM manufacturer of USB chargers, power adapters, car chargers, speakers and jump starters.

With the rapid development under strict standards of ISO9001, as well as CE, ROHS, FCC, KC, SAA, C-tick, EPR, CCC and CB certified, now we have a total area of 5,000 square meters. Our factory is well with all production workshops such as molding, plastic injection, silk screen printing, painting spray, metal processing, final assembly and packaging, which enable all steps to be well controlled in house and guarantee total customer satisfaction.

We aim to become a leading company in charging power field and devote to bringing people a simple and comfortable lifestyle.

FAQ

1. Will the Car Jump Starter start every vehicle?

It can start 12V car batteries only with a CC rating up to 3500CC gasoline and 2500cc diesel vehicles.

2. what`s the most greatest advantages of your car jump starter?

We use high power high current discharge polymer lithium battery, instantaneous starting current can reach 500 mah.

3. What happens when the positive and negative clamps wrongly connected, is it dangerous,will that harm my car?

Our product has protection against this. when the car battery is short circuit, it will protect you from danger, neither will harm your car. when you connect the clamps incorrectly, the red indicator will be illuminated, reminding you to remove the battery and re-connect.
